Job Experience:

American Express (May 2019 – Present)

- Software Engineer
 - o Led a team of developers to create drag and drop photoshop like personalized dynamic content builder UI (React.js, Interact.js, GraphQL, Node.js)
 - o Built and maintained an internal marketing campaign management UI. This tool enables 7M+ Amex card members to receive personalized dynamic emails everyday. (React.js, Redux, Node.js, Java)
 - o Designed robust Rest Endpoints, developed GraphQL Mutations/Queries and managed NoSql and Sql databases.
 - o Deployed Applications to enterprise cloud platform using modern CI/CD work flows (Jenkins, Docker)

Freelance Web Developer (September 2018 – Present)

- Web Developer
 - o Converted PSDs/Designs to responsive web pages for clients.
 - o Created digital menus with Html, CSS, and JavaScript.

Empire Capital Holdings (Think Empire) (November 2018 – March 2019)

- Full Stack Web Development Intern
 - o Was responsible for creating user-friendly mobile responsive interfaces for a real estate application. Used the google maps api to display properties on a map. As well as displaying all property related data in the UI. The application aimed to allow real estate brokers to find leads for cold calling real estate property owners. (React, Redux, Node.JS)
 - o Integrated the application with 3rd party APIs via Node.js, developed backend routes/APIs, and MySQL queries.
